

ALUMINIUM **QUICK SYSTEM** FRAME AND **FIBRE TECH** FIBREGLASS FRAME

- Dorema offers, as an optional extra on most of their models, the aluminium **QUICK SYSTEM** frame or the totally new lightweight **FIBRE TECH** fibreglass frame.
- The ultra light aluminium **QUICK SYSTEM** frame consists of only three major sections and three roof support poles. Each section contains a number of poles which are telescopic or are connected together with a spring system.
- The very latest in fibreglass frame technology, **FIBRE TECH** is a top quality woven fibreglass tube that is incredibly strong, easy to handle and simple to erect. The unique construction of the **FIBRE TECH** frame ensures maximum strength at all times. **FIBRE TECH** is suitable for both permanent site use or touring.

LIGHTWEIGHT ALUMINIUM FRAME

ULTRA LIGHT

LIGHTWEIGHT
(about half the weight of steel)

NO RUST
(long life span)

28 mm ALUMINIUM TUBING
(the corner angles are made from steel)

Dorema aluminium **QUICK SYSTEM** frame

With the development of the **QUICK SYSTEM** frame our design team have turned the complication of erecting a caravan awning into a simple and foolproof task. Each frame (standard size) now consists of only three major sections and three roof support poles. Searching for all the separate parts is now a thing of the past and gone forever are the problems of missing or loose poles.

Each frame (standard size) now consists of only three major sections and three roof support poles. Each section contains a number of poles which are telescopic or are connected together with a spring system.

The very strong locking clamps provide a strong grip on the frame. The clamps are designed not to damage the outer surface of the frame.

Some frame parts which are not telescopic are connected together with a strong spring. Searching for all the separate parts is now a thing of the past.

FIBRE TECH FIBREGLASS FRAME

HIGH TECH CONSTRUCTION

- Ultra light, about half the weight of steel
- Extremely strong material
- Long life
- Very stable

Extra strong roof support poles ensure the frame is even more stable.

Dorema **FIBRE TECH** fibreglass frame

The **FIBRE TECH** frame is a totally new concept in lightweight frame design. Using the latest Pull-Winding technique to weave the fibreglass into a series of layers ensuring a mix of superior strength and flexibility.

The finished frame is coated with a layer of lacquer giving the outer surface a tough smooth finish.

Beside these special technical features fibreglass is extremely strong, corrosion resistant and completely maintenance free.

All the main frame angles are manufactured in a specially reinforced material that has been designed for maximum strength. The adjusting clamps are simple to adjust in order to obtain maximum tension.

Strong adjusting clamp for maximum tension.

Reinforced frame angle in a modern design.
