Where space and design meet

WELCOME TO DOREMA

Established since 1987, for more than 35 years, Dorema have been specialising in the design and manufacturing of quality caravan and motorhome awnings.

As a leading manufacturer within the leisure industry, we source a variety of high-performance materials to produce our fantastic portfolio of products. From lightweight to the most durable, each awning is thoroughly checked prior to receiving its Dorema Quality Certificate. This stamp of approval is a recognised standard that is envied within our industry.

We strive to incorporate the very latest technologies and to introduce those of the future. Each of our awnings are designed to suit the differing needs and demands of today's and tomorrow's campers.

Our passion is to enhance space and create an extra dimension to the joy of camping.

Dorema's collection of awnings caters to all tastes and our nationwide network of dealers are there to assist you in making the right choice.

It does not stop there, our wonderful team in the UK are able to share their wealth of knowledge. They are more than happy to be of assistance and to guide you to your new Dorema awning.

"Your holiday starts here!"

Our awnings and canopies are developed and produced in our own state of the art production facilities in Europe.

We stand for quality and service. Dorema uses the very latest technologies to ensure that our products are trouble free and that you, the customer, are able to have many happy holidays.

**2 YEAR
WARRANTY**

products

DETAILS

QUALITY IS IN THE DETAIL

TENCATE OUTDOOR FABRICS

Dorema awnings are manufactured using, world leading, TenCate outdoor fabrics which provide optimal all round protection for years of enjoyment.

DormaTex is coated polyester material, which has been exclusively designed by TenCate for Dorema Awnings.

YKK Opti

Doréma only uses the high quality zippers of YKK and Optilon to ensure ease of use for years to come.

SIOEN INDUSTRIES

SIOEN is the World market leader in coated technical textiles.

Standard with all Dorema awnings: Draught Skirt / Wheel Arch Cover / Ladder Straps / Heavy Duty Nylon Pegs / Canvas & Frame Bags.

SAFE LOCK SYSTEM

SafeLock System fitted as standard to attach the optional extra SafeLock System Kit.

EASYGRIP

EasyGrip system for rapid locking and ease of frame tensioning.

QUICKLOCK PADS INCLUDED

EASY AIR FRAME

Easy Air Frame system.

HAND PUMP INCLUDED

Caravans

Measure your caravan through the awning rail from ground to ground (A-B-C) as shown in the diagram below. Then check your measurement against the chart. This will provide you with the Dorema awning size required.

Seasonal Caravanners please note:

Dorema strongly recommend that anyone seasonally siting their awning should measure the caravan on the seasonal pitch prior to ordering their awning, (for example, a pitch with decking could alter the awning size required).

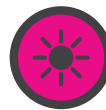

SIZE	A-MEASUREMENT CM

Royal 350 De Luxe

An aerial photograph of a rural property. In the upper right, there are two small buildings with dark roofs. Below them is a small, irregularly shaped pond. To the left of the pond is a blue container. The property is surrounded by lush green trees and grass. A winding path or road is visible on the left side. The image is divided into four quadrants by white lines that intersect at a central point. The text "EMBRACE NEW ADVENTURES" is written in a bold, italicized, sans-serif font across the middle of the image, spanning across the quadrants.

EMBRACE NEW ADVENTURES

DOREMA PORCH AWNINGS

When producing our porch awnings, we incorporate the same quality materials that can be found on our collection of full awnings. The demands of today's and tomorrow's campers are at the forefront of our innovation and design process, while maintaining our passion to enhance space and create an extra dimension to the joy of camping.

'Which porch awning will fit my caravan?'

*This is a common question that we are regularly asked. Our porch awnings are designed to fit along the straight horizontal section of the awning rail on your caravan (**measurement A**). The measurement from the ground to the awning rail, at the top of your caravan, should be 235cm to 250cm (**measurement B**).*

We provide the floor size measurement and the roof width measurement for all of our porch awnings. These measurements will determine whether the sides of the porch awning are sloping or 90 degrees vertical. There are other factors which you may want to consider, for example, the location of vents, lockers, windows, etc. With this information you will be able to make the right choice on the porch awning that best suits your requirements.

DAVOS & OSLO

***THOUGH YOU ARE FAR FROM HOME
YOU ALWAYS FEEL RIGHT AT HOME***

AIR AWNING TECHNOLOGY HAS PROVEN TO BE A HUGE POPULAR CHOICE WITH TODAY'S CAMPERS.

We have embraced this and combined our recognised quality with the air technology to create an extensive range of strong and durable inflatable awnings. Our designs compliment the traditional with the modern.

Our EAF (Easy Air Frame) System, with its single inflation point and multi-valve deflation points, make our air frames very simple and fast to use.

When inflated, the isolation valves provide stability, reliability and easy maintenance.

Our innovations and designs enhance space and creates an extra dimension to the joy of modern-day camping.

DAYTONA AIR

Double your living space with ease

The pioneer of traditional shaped full air awnings / Easy Air Frame System (EAF) / Single Inflation Point / Isolation Valves

LUXOR AIR 280

LATEST UNIQUE MODERN DESIGN FULL AIR AWNING 280CM DEEP

The Luxor Air 280 is an exciting addition to our superb collection of full air awnings. Specially developed, this luxurious design is enhanced by the generous space that the 280cm depth provides.

Incorporating our Easy Air Frame system, the Luxor Air 280 is rapidly inflated from a single external inflation point. Each air tube section can then be isolated for easy maintenance and to preserve the air pressure within each individual section of the main air frame.

The unique shape allows maximum light to enter the awning adding an extra dimension to your comfort and to the joy of seasonal camping.

STARLON CARPET, FRAMES & ACCESSORIES

STARLON® AWNING CARPET

Heavy Duty , strong & durable

Dorema has developed this user friendly carpet to ensure the optimal compatibility with your new awning. Starlon is produced in two complimentary colours: Grey and Blue.

This quality carpet is hardwearing, making it suitable for weekend campers and the more enthusiastic seasonal campers. The texture is soft and comfortable especially when the little ones are running around in their bare feet.

Accidental stains such as coffee or red wine are easily removed by using a damp cloth. The construction of the weave allows the Starlon Awning Carpet to breathe making it friendly to the ground beneath.

WHICH AWNING CARPET SIZE DO I NEED? *	AWNING SIZE	CARPET SIZE

STORMPOLE

For extra stability. Available in Steel, Aluminium and FibreTech Plus.

SAFELOCK SYSTEM KIT (SET OF 2)

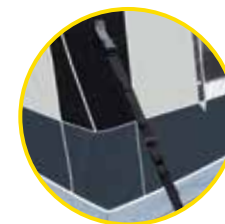

Fits all current Dorema poled, full awnings & porch awnings *(Except Davos Winter Porch)*

Now available for precious models for universal use. SafeLock System Kit not included.

TRIPLE SAFELOCK SYSTEM KIT (SET OF 3)

All Dorema Full Air awnings are equipped with SafeLock System buckles to attach these straps. Consisting of 3 x straps, 3 x high tension springs and 3 x large steel pegs, the Triple SafeLock System Kit is available as a must have optional extra.

FRAMES

1 STEEL

The Steel frames offer great stability and are easy to assemble with the EasyGrip clamp system. When you have a seasonal pitch, we highly recommend to use our 28 mm steel frames for extra stability and a carefree stay.

2 ALU QUICK SYSTEM

ALU QUICK SYSTEM: The ultra light aluminium frame consists of only three major sections and three roof support poles. Each section contains a number of poles which are telescopic or are connected together with a spring system. All angle joints are made of steel.

- **Lightweight** (about half the weight of steel).
- **No rust**

3 FIBRETECH PLUS

The very latest in fibreglass frame technology, manufactured from 30 mm and 25,5 mm diameter tubing. This is a top quality woven fibreglass tube that is incredibly strong, easy to handle and simple to erect. The unique construction of the FibreTech Plus frame ensures a degree of flexibility with maximum strength at all times.

- **Ultra light and flexible**
- **Easy to erect**
- **Very stable**
- **Long life**
- **New EasyGrip clamp system**

4 EASY AIR FRAME SYSTEM (EAF)

The Easy Air Frame System consists of seamless TPU inner tubes that are high frequency welded on the ends. The inner tubes are protected within reinforced twin walled outer jackets. Inflation is achieved by an external single valve system that incorporates isolation valves which isolate each section of the main air frame. This also helps to preserve the air pressure within each inner tube. For rapid deflation, simply open the isolation valves and release the the air pressure from external multi-valves which are located at the front of the awning. The Easy Air Frame is only inflated to 8 -10 psi (max.) and makes the pitching of the air awning fast and simple.
