CUT TO PERFECTION

# WHY CHOOSE DOREMA?

*Established since 1987, for almost 40 years, Dorema have been specialising in the design and manufacturing of quality caravan and motorhome awnings.*

**SATTLER** premium awning fabrics are used on our diamond and quartz awnings. This fabric is 100% solution dyed acrylic, guaranteeing top level performance, outstanding UV protection and a luxury feel.

The breathability of this material helps to reduce the level of condensation and provides a comfortable atmosphere within these awnings.

**TenCate's** Polyester all-season coated fabrics provide strength and durability throughout the Dorema range of awnings.

The fabric possesses excellent UV, mold and dirt resistancy, which enhances the longevity of the awning and allows for the ease of maintenance and care.

Our Keep Sure system is a roof spike system that is incorporated within our awning frames.

When the awning is pitched correctly this simple system ensures perfect tension to the roof and rain canopy, providing strength, stability, and allowing the run-off of rain water.

Dorema only use the highest quality zips from both YKK and Opti. To ensure ease of use for years to come.

**SIOEN** is the world market leader in PVC coated and technical textiles, giving you maximum durability where you need it the most.

All our Dorema products are manufactured in our own European facilities to ensure the highest quality of manufacturing.

## Caravans

Measure your caravan through the awning rail from ground to ground (A-B-C) as shown in the diagram below. Then check your measurement against the chart. This will provide you with the Dorema awning size required.

### Seasonal Caravanners please note:

Dorema strongly recommend that anyone seasonally siting their awning should measure the caravan on the seasonal pitch prior to ordering their awning, (for example, a pitch with decking could alter the awning size required).

SIZE	A-MEASUREMENT CM	SIZE	A-MEASUREMENT CM
2	675 – 700	13	950 – 975

- Removable Velcro Mudwall
- Printed pattern design on the inside of the roof
- Both touring and seasonal use
- Modern design with large windows
- Canopy poles as standard

**REMOVABLE  
VELCRO  
MUDWALL**

# SATTLER ACRYLIC

Within our Diamond range, we utilize Sattler's 100% solution-dyed acrylic fabric. Unlike conventional coatings, this advanced process infuses color and protective agents into each individual fibre, ensuring deep, uniform saturation. This results in exceptional resistance to fading and UV degradation, providing long-lasting performance and reliability, even in the most sun-exposed environments. With our awnings, you can enjoy every holiday with confidence and style.

## Keep Sure System

Our Keep Sure system is a roof spike system that is incorporated within our awning frames. When the awning is pitched correctly this simple system ensures perfect tension to the roof and rain canopy, providing strength, stability, and allowing the run-off of rain water.

*DIAMOND 240*

**EMBRACE NEW ADVENTURES**

# DOREMA PORCH AWNINGS

*When producing our porch awnings, we incorporate the same quality materials that can be found on our collection of full awnings. The demands of today's and tomorrow's campers are at the forefront of our innovation and design process, while maintaining our passion to enhance space and create an extra dimension to the joy of camping.*

## **'Which porch awning will fit my caravan?'**

*This is a common question that we are regularly asked. Our porch awnings are designed to fit along the straight horizontal section of the awning rail on your caravan (**measurement A**). The measurement from the ground to the awning rail, at the top of your caravan, should be 235cm to 250cm (**measurement B**).*

*We provide the floor size measurement and the roof width measurement for all of our porch awnings. These measurements will determine whether the sides of the porch awning are sloping or 90 degrees vertical. There are other factors which you may want to consider, for example, the location of vents, lockers, windows, etc. With this information you will be able to make the right choice on the porch awning that best suits your requirements.*

***WHEN YOU ARE AWAY  
DOREMA HELPS YOU FEEL AT HOME***

## *AIR AWNING TECHNOLOGY HAS PROVEN TO BE A HUGELY POPULAR CHOICE WITH TODAY'S CAMPERS.*

We have merged our renowned quality with advanced air technology to develop a comprehensive range of robust and long-lasting inflatable awnings. Our designs seamlessly blend classic elements with contemporary aesthetics.

Our EAF (Easy Air Frame) System features a single inflation point and multiple deflation valves, ensuring our air frames are straightforward and quick to set up.

Once inflated, the isolation valves offer stability, dependability, and effortless upkeep.

Our innovative designs maximize space, adding a new level of comfort and enjoyment to modern camping experiences.

# LUXOR AIR 280

Latest unique modern design Full Air Awning 280cm Deep

The Luxor Air 280 is an exciting addition to our superb collection of full air awnings. Specially developed, this luxurious design is enhanced by the generous space that the 280cm depth provides.

Incorporating our Easy Air Frame system, the Luxor Air 280 is rapidly inflated from a single external inflation point. Each air tube section can then be isolated for easy maintenance and to preserve the air pressure within each individual section of the main air frame.

The unique shape allows maximum light to enter the awning adding an extra dimension to your comfort and to the joy of seasonal camping.

# STARLON® AWNING CARPET

Heavy Duty, strong & durable

Dorema's Starlon Awning Carpet has been carefully crafted to elevate your outdoor living space while seamlessly complementing your new awning.

Constructed from strong, durable PVC, it combines practicality with comfort, ensuring easy maintenance—simply wipe away accidental spills with a damp cloth.

Designed with versatility in mind, the Starlon Awning Carpet is ideal for both casual weekend campers and dedicated seasonal users. Its soft, inviting texture makes it perfect for children to enjoy barefoot play, while its breathable weave gently protects the ground beneath. Functional, stylish, and environmentally considerate, it is the perfect finishing touch to any camping setup.

## CORDLESS ELECTRIC PUMP

High Performance, Rechargeable Electric Air Pump Integrated 12V DC battery, standard 110-240 AC DC adaptor.

## DOREMA LOCKING RAIL STOPPER

*The small gadget that makes a big difference.*

The perfect solution for securing your porch awning — especially if your caravan, campervan, or motorhome is exposed to windy conditions. This smart little device locks the beading of your porch awning firmly in place along the awning rail, restricting side-to-side movement.

- Quick and easy to fit
- Keeps porch/ drive-away awning locked in place
- Ideal for seasonal or windy locations
- Strong, durable steel construction

With the Dorema Locking Rail Stopper, you can relax and enjoy your adventure, knowing your awning is safe and secure.

## ACCESSORIES

## KEEP SURE SYSTEM

Our Keep Sure system is a roof spike system that is incorporated within our awning frames. When the awning is pitched correctly this simple system ensures perfect tension to the roof and rain canopy, providing strength, stability, and allowing the run-off of rain water.

### 1 STEEL

The Steel frames offer great stability and are easy to assemble with the EasyGrip clamp system. When you have a seasonal pitch, we highly recommend to use our 28 mm steel frames for extra stability and a carefree stay.

### 2 FIBRETECH PLUS

The very latest in fibreglass frame technology, manufactured from 30 mm and 25,5 mm diameter tubing. This is a top quality woven fibreglass tube that is incredibly strong, easy to handle and simple to erect. The unique construction of the FibreTech Plus frame ensures a degree of flexibility with maximum strength at all times.

- Ultra light and flexible
- Easy to erect
- Very stable
- Long life
- EasyGrip clamp system

### 3 EASY AIR FRAME SYSTEM (EAF)

The Easy Air Frame System consists of seamless TPU inner tubes that are high frequency welded on the ends. The inner tubes are protected within reinforced twin walled outer jackets. Inflation is achieved by an external single valve system that incorporates isolation valves which isolate each section of the main air frame. This also helps to preserve the air pressure within each inner tube. For rapid deflation, simply open the isolation valves and release the air pressure from external multi-valves which are located at the front of the awning. The Easy Air Frame is only inflated to 8 -10 psi (max.) and makes the pitching of the air awning fast and simple.
