MONZA 240 DE LUXE
STYLE, SPACE AND FLEXIBILITY IN ONE AWNING

YOUR HOLIDAY STARTS HERE!

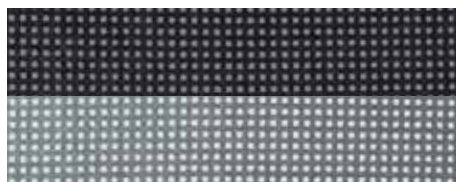

WWW.DOREMA.CO.UK

WHY CHOOSE DOREMA?

TENCATE OUTDOOR FABRICS

Ten Cate's polyester all-season coated fabrics provide strength and durability throughout the Dorema range of awnings.

The fabric possesses excellent UV, mould and dirt resistance, which enhances the longevity of the awning and allows for the ease of maintenance and care.

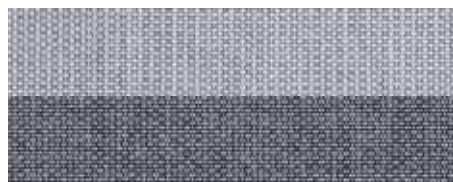

Dormatex

SATTLER thinking highTEX

SATTLER premium awning fabrics are used on our diamond and quartz awnings. This fabric is 100% solution-dyed acrylic, guaranteeing top-level performance, outstanding UV protection and a luxury feel.

This breathable material helps to reduce the level of condensation and provides a comfortable atmosphere within these awnings.

Acryl

Our Keep Sure system is a roof spike system that is incorporated within our awning frames.

When the awning is pitched correctly this simple system ensures perfect tension to the roof and rain canopy, providing strength, stability, and allowing the run-off of rainwater.

SIOEN INDUSTRIES

SIOEN is the world market leader in PVC coated and technical textiles, giving you maximum durability where you need it the most.

YKK Opti

Dorema uses only the highest-quality zips from YKK and Opti to ensure ease of use for years to come.

Dorema products are manufactured to the highest quality standards, combining our European manufacturing expertise with carefully selected production facilities to ensure consistent quality and performance across our range.

MEASUREMENTS

CARAVANS

Measure your caravan through the awning rail from ground to ground (A-B-C) as shown in the diagram below. Then check your measurement against the chart. This will provide you with the Dorema awning size required.

Seasonal Caravanners please note:

Dorema strongly recommend that anyone seasonally siting their awning should measure the caravan on the seasonal pitch prior to ordering their awning (for example, a pitch with decking could alter the awning size required).

SIZE	A-MEASUREMENT CM
2	675 – 700
3	700 – 725

STANDARD DELIVERY

All our poled awnings come as standard with our EasyGrip system. All our poled awnings come as standard with our EasyGrip system for rapid locking and easy frame tensioning. Quick Lock Pads to attach the awning to the caravan are included with all poled awnings.

All our air awnings come as standard with a hand pump. Recommended air pressure is 8-10 psi. Air awnings need to be monitored regularly and may require a top-up of air to maintain stability. Safe Lock System is standard, to attach the optional extra Safe Lock System Kit.

NEW FOR 2027

TRANSFORM YOUR OUTDOOR SPACE WITH THE CONTOUR CASSETTE AWNING

Discover a whole new way to enjoy your cassette awning with the NEW Contour Awning. Its clever frame system has been designed to fit almost any cassette awning, transforming your existing set-up into a stylish and comfortable outdoor living space.

Powerful magnets and specially designed foam profiles create a secure, wind- and watertight seal, giving you greater protection from the elements and more opportunities to enjoy the outdoors. Make it your own with a choice of optional front wall panel sizes.

Whether you prefer a more open outlook or extra shelter and privacy, you can create a beautifully tailored space to suit the way you relax. More comfort.

More protection. More ways to enjoy your awning.

DOREMA PORCH AWNINGS

When producing our porch awnings, we incorporate the same quality materials that can be found on our collection of full awnings. The demands of today's and tomorrow's campers are at the forefront of our innovation and design process, while maintaining our passion to enhance space and create an extra dimension to the joy of camping.

'WHICH PORCH AWNING WILL FIT MY CARAVAN?'

This is a common question that we are regularly asked. Our porch awnings are designed to fit along the straight horizontal section of the awning rail on your caravan (**measurement A**). The measurement from the ground to the awning rail, at the top of your caravan, should be 235 cm to 250 cm (**measurement B**).

We provide the floor size measurement and the roof width measurement for all of our porch awnings. These measurements will determine whether the sides of the porch awning are sloping or vertical at 90 degrees. There are other factors which you may want to consider, for example, the location of vents, lockers, windows, etc. With this information you will be able to make the right choice on the porch awning that best suits your requirements.

QUARTZ 330 DE LUXE & 400 DE LUXE

ROOM TO RELAX, SPACE TO ENJOY

WINTER

SEASONAL

TOURING

PORCH AWNINGS

ACRYLIC

The Quartz is available in two versatile sizes: the spacious Quartz 400, offering an impressive 400 cm width, and, from 2027, the compact Quartz 330, with a 330 cm width. Both models feature a practical design, large windows and durable construction, combining comfort, flexibility and reliable protection for longer stays and family adventures.

TECHNICAL DATA

The Next Generation of Inflatable Awning Technology!

Our inflatable awning technology has become a firm favourite with today's campers, combining trusted quality with innovative design and effortless setup.

For 2027, we continue to bring together our renowned build quality and advanced air-frame technology to create a comprehensive range of strong, durable and long-lasting inflatable awnings. Each design blends timeless styling with contemporary aesthetics, delivering practical performance without compromising on looks.

Easy Air Frame (EAF) System

Our EAF (Easy Air Frame) System has been engineered for simplicity. With a single inflation point and multiple deflation valves, our air frames are quick and straightforward to erect, making setup easier and getting you ready to enjoy your camping experience sooner.

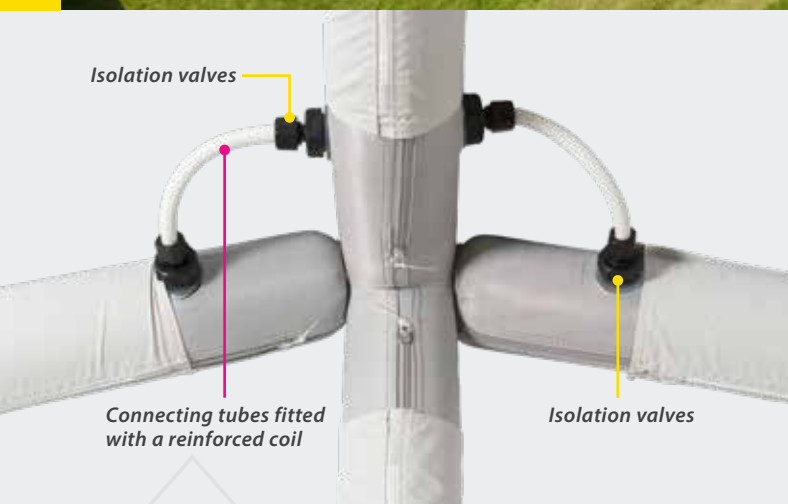

Once inflated, integrated isolation valves provide excellent frame stability and reliability, while also making maintenance simple and hassle-free.

More Space. More Comfort. More Enjoyment.

Our innovative awning designs are created to make the most of your available space, providing generous living areas and enhanced comfort wherever your adventures take you.

Built for modern camping. Designed for easy living.
Ready for your next adventure.

EAF - EASY AIR FRAME SYSTEM

- External single inflation point
- External multi-valve for rapid deflation
- Isolation valves
- Connecting tubes fitted with a reinforced coil
- Reinforced twin-walled inner tube jacket
- Seamless tubular TPU inner tube with high-frequency welds at each end
- EAF system supplied with a high-volume hand pump

STARLON® AWNINGCARPET

HEAVY DUTY, STRONG & DURABLE

STARLON AWNINGCARPET

Dorema's Starlon awning carpet has been carefully crafted to elevate your outdoor living space while seamlessly complementing your new awning. Constructed from strong, durable PVC, it combines practicality with comfort, ensuring easy maintenance. Simply wipe away accidental spills with a damp cloth. Its soft, inviting texture makes it perfect for children to enjoy barefoot play, while its breathable weave gently protects the ground beneath.

Functional, stylish, and environmentally considerate, it is the perfect finishing touch to any camping setup.

DOREMA LOCKING RAIL STOPPER

The small gadget that makes a big difference. The perfect solution for securing your porch awning, especially if your caravan, campervan, or motorhome is exposed to windy conditions. This smart little device locks the beading of your porch awning firmly in place along the awning rail, restricting side-to-side movement.

- Quick and easy to fit
- Keeps porch/drive-away awning locked in place
- Ideal for seasonal or windy locations
- Strong, durable steel construction

With the Dorema Locking Rail Stopper, you can relax and enjoy your adventure, knowing your awning is safe and secure.

CORDLESS ELECTRIC PUMP

This compact electric air pump is cordless, rechargeable and weighs only 1.2 kilograms. Ideal for inflating an airframe awning quickly. The powerful 11.1V battery delivers an airflow of 75 liters per minute. Easy to recharge via a USB-C cable or car plug. Can also be used as a power bank. Equipped with integrated LED lighting for use in the dark. Includes a sturdy carrying bag.

FRAMES

KEEP SURE SYSTEM

Our Keep Sure system is a roof spike system that is incorporated within our awning frames. When the awning is pitched correctly this simple system ensures perfect tension to the roof and rain canopy, providing strength, stability, and allowing the run-off of rain water.

STEEL

The Steel frames offer great stability and are easy to assemble with the EasyGrip clamp system. When you have a seasonal pitch, we highly recommend using our 28 mm steel frames for extra stability and a carefree stay.

FIBRETECH PLUS

The very latest in fibreglass frame technology, manufactured from 30 mm and 25.5 mm diameter tubing.

This is a top-quality woven fibreglass tube that is incredibly strong, easy to handle and simple to erect.

The unique construction of the FibreTech Plus frame ensures a degree of flexibility with maximum strength at all times.

- Ultra light and flexible
- Easy to erect
- Very stable
- Long life
- EasyGrip clamp system

EASY AIR FRAME SYSTEM (EAF)

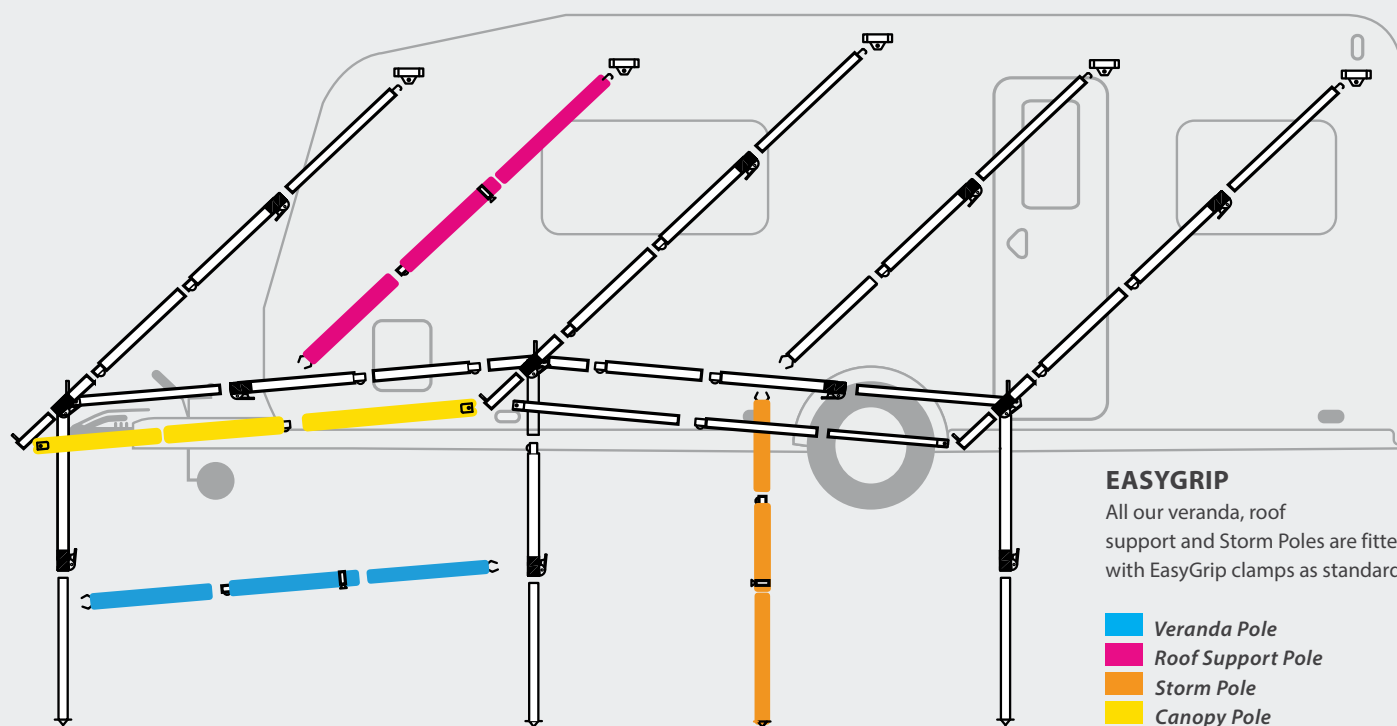

The Easy Air Frame System consists of seamless TPU inner tubes that are with high-frequency welds at the ends. The inner tubes are protected within reinforced twin-walled outer jackets. Inflation is achieved by an external single valve system that incorporates isolation valves which isolate each section of the main air frame. This also helps to preserve the air pressure within each inner tube. For rapid deflation, simply open the isolation valves and release the air pressure from external multi-valves which are located at the front of the awning. The Easy Air Frame is only inflated to 8-10 psi (max.) and makes the pitching of the air awning fast and simple.

QUICK LOCK PADS

Supplied as standard with all Dorema full poled awnings and canopies.
